Food and Drug Administration, HHS

enteropathies (ileitis) associated with Lawsonia intracellularis.

- (2) Limitations. Use 100 grams per ton for at least 3 weeks followed by 40 grams per ton until market weight; as tylosin phosphate.
- (c) Amount per ton. Tylosin, 40–100 grams.
- (1) Indications for use. For the treatment and control of swine dysentery associated with Brachyspira hyodysenteriae and for the control of porcine proliferative enteropathies (PPE, ileitis) associated with Lawsonia intracellularis.
- (2) Limitations. Administer as tylosin phosphate in feed for 2 to 6 weeks, immediately after treatment with tylosin tartrate in drinking water as in §520.2640(d)(3) of this chapter.
- (d) Amount per ton. Tylosin, 100 grams.
- (1) Indications for use. Maintaining weight gains and feed efficiency in presence of atrophic rhinitis.
- (2) Limitations. As tylosin phosphate.
- (vi) Pyrantel tartrate in accordance with §558.485.
 - (e) Amount per ton. Tylosin 100 grams.
- (1) Indications for use. For the control of porcine proliferative enteropathies (PPE, ileitis) associated with Lawsonia intracellularis.
- (2) *Limitations*. As tylosin phosphate, administer for 21 days.
- (2) Tylosin may also be used in combination with:
- (i) Decoquinate and monensin as in \$558.195.
 - (ii) Hygromycin B as in §558.274.
- (iii) Melengestrol acetate alone or in combination with certain ionophores as in §558.342.
 - (iv) Monensin as in §558.355.
 - (v) Narasin as in §558.363.
- (vi) Pyrantel tartrate as in §558.485.
- (vii) Ractopamine alone or in combination as in §558.500.
 - (viii) Salinomycin as in §558.550.
- (ix) Zilpaterol alone or in combination as in §558.665.

EDITORIAL NOTE: For FEDERAL REGISTER citations affecting §558.625, see the List of CFR Sections Affected, which appears in the Finding Aids section of the printed volume and on GPO Access.

§558.630 Tylosin and sulfamethazine.

- (a) Specifications. Type A medicated articles containing equal amounts of tylosin phosphate and sulfamethazine, available in concentrations of 4, 5, 10, 20, or 40 grams each, per pound.
- (b) Approvals. See sponsor numbers in §510.600(c) of this chapter for use as in paragraph (e) of this section.
- (1) No. 000986: 10 or 40 grams per pound each for use as in paragraph (e)(2)(i) of this section.
- (2) No. 012286: 2 grams per pound each for use as in paragraph (e)(2)(i) of this section.
- (3) No. 051311: 40 grams per pound each for use as in paragraph (e)(2)(ii) of this section.
- (4) No. 017139: 4, 10, or 20 grams per pound each for use as in paragraph (e)(2)(ii) of this section.
- (5) Nos. 000986, 010439, 012286, 016968, 024174, 030841, 034936, 035098, 046573, 046987, and 051359: 5, 10, 20, or 40 grams per pound each for use as in paragraph (e)(2)(ii) of this section.
- (6) No. 000986: 40 grams per pound each for use as in paragraph (e)(2)(iii) of this section.
- (c) Special considerations. Labeling shall bear the statement: "Do not use in medicated feeds containing in excess of 2% bentonite."
- (d) Related tolerances. See §§ 556.670 and 556.740 of this chapter.
- (e) Conditions of use. It is used in feed for swine as follows:
- (1) Amount per ton. 100 grams tylosin and 100 grams sulfamethazine.
- (2) Indications for use—(i) Maintaining weight gains and feed efficiency in the presence of atrophic rhinitis; lowering the incidence and severity of Bordetella bronchiseptica rhinitis; prevention of swine dysentery (vibrionic); control of swine pneumonias caused by bacterial pathogens (Pasteurella multocida and/or Corynebacterium pyogenes); for reducing the incidence of cervical lymphadenitis (jowl abscesses) caused by Group E Streptococci. Only the sulfamethazine portion of this combination is active in controlling jowl abscesses.
- (ii) Maintaining weight gains and feed efficiency in the presence of atrophic rhinitis; lowering the incidence and severity of *Bordetella bronchiseptica* rhinitis; prevention of swine dysentery (vibrionic); control of

§ 558.635

swine pneumonias caused by bacterial pathogens (*Pasteurella multocida* and/or *Corynebacterium pyogenes*).

- (iii) For maintaining weight gains and feed efficiency in the presence of atrophic rhinitis; lowering the incidence and severity of Bordetella bronchiseptica rhinitis; prevention of swine dysentery associated with Brachyspira hyodysenteriae; and control of swine pneumonias caused by bacterial pathogens (Pasteurella multocida and/or Arcanobacterium pyogenes).
- (3) Limitations. Withdraw 15 days before swine are slaughtered.

[73 FR 34185, June 17, 2008, as amended at 73 FR 35341, June 23, 2008]

§ 558.635 Virginiamycin.

- (a) Approvals. Type A medicated articles. (1) 1.1 percent activity (5 grams per pound), 2.2 percent activity (10 grams per pound), 4.4 percent activity (20 grams per pound), 11 percent activity (50 grams per pound), and 50 percent activity (227 grams per pound) used as in paragraph (d) of this section; and 30 percent activity (136.2 grams per pound) for the manufacture of Type C medicated feed for cattle used as in paragraph (d)(3); to 066104 in §510.600(c) of this chapter.
- (2) 2.2 percent activity (10 grams per pound) to 046573, 016968, and 017790 in $\S510.600(c)$ of this chapter for use as in paragraphs (d)(1)(iv) and (d)(1)(v) of this section.
- (b) Related tolerances. See §556.750 of this chapter.
- (c) Special considerations. (1) Not for use in breeding swine over 120 pounds.
- (2) Dilute Type A article with at least 10 pounds of a feed ingredient prior to final mixing in 1 ton of Type C feed.
- (d) Conditions of use—(1) Swine. It is used as follows:
- (i) 100 grams per ton for 2 weeks, for treatment of swine dysentery in nonbreeding swine over 120 pounds.
- (ii) 100 grams per ton for 2 weeks, 50 grams per ton thereafter, for treatment and control of swine dysentery in swine up to 120 pounds.
- (iii) 25 grams per ton, as an aid in control of dysentery in swine up to 120 pounds. For use in animals or on premises with a history of swine dysentery

but where symptoms have not yet occurred.

- (iv) 10 grams per ton from weaning up to 120 pounds for increased rate of weight gain and improved feed efficiency, followed by 5 grams per ton to market weight for increased rate of weight gain and improved feed efficiency. For continuous use from weaning to market weight.
- (v) 10 grams per ton from weaning up to 120 pounds for increased rate of weight gain and improved feed efficiency, followed by 5 to 10 grams per ton to market weight for increased rate of weight gain. For continuous use from weaning to market weight.
 - (2) Poultry. It is used as follows:
- (i) 5 to 15 grams per ton for increased rate of weight gain, for use in broiler chickens, not for use in layers.
- (ii) 5 grams per ton for increased rate of weight gain and improved feed efficiency in broiler chickens, not for use in layers.
- (iii) 20 grams per ton for prevention of necrotic enteritis caused by *Clostridium perfringens* susceptible to virginiamycin in broiler chickens; not for use in layers.
- (iv) 10 to 20 grams per ton for increased rate of weight gain and improved feed efficiency in growing turkeys.
 - (3) Cattle. It is used as follows:
- (i) 16.0 to 22.5 grams per ton to provide 100 to 340 milligrams per head per day for increased rate of weight gain.
- (ii) 13.5 to 16.0 grams per ton to provide 85 to 240 milligrams per head per day for reduction of incidence of liver abscesses.
- (iii) 11.0 to 16.0 grams per ton to provide 70 to 240 milligrams per head per day for improved feed efficiency.
- (iv) Feed continuously as sole ration to cattle fed in confinement for slaughter. Not for use in animals intended for breeding.
- (4) Virginiamycin may be used in combination with:
- (i) Amprolium and ethopabate as in \$558.58.
 - (ii) Diclazuril as in §558.198.
 - (iii) Halofuginone as in §558.265.
- (iv) Lasalocid as in §558.311.
- (v) Monensin alone or with roxarsone as in §558.355.
